Why We Need Alkaline Water?

Alkaline water has a higher pH level than that of plain tap water. So proponents say that it can neutralize acid in your bloodstream. Some say that alkaline water can help prevent disease, such as cancer and heart disease. However, more research is needed to verify these claims.

Some studies also suggest that alkaline water might help slow bone loss. But further studies are needed to find out if it influences overall bone mineral density and if the benefit continues over the long term.

Health Benefits of Alkaline Water

Diet, stress, and exposure to toxins take a huge toll on our bodies. Much of the food we eat, and the beverages we drink lower the body's pH, and accelerate damage to tissues, which results poor health and premature aging.

Ordinary water does nothing to help. Today's drinking water is laden with toxins, and treated with so many chemicals that it has been rendered a lifeless, tasteless liquid. Fortunately, LIFE water ionizers are equipped with cutting edge filtration systems and potent water ionization technology designed to restore water to its natural healthy state.

- **Beneficial characteristics of water produced by LIFE Ionizers:**
 - Contains beneficial minerals
 - Micro clustering water improves hydration
 - Ionization adds beneficial antioxidants
- **Health benefits of drinking ionized alkaline water:**
 - Detoxifies at the cellular level
 - Helps maintain a healthy pH balance
 - Age fighting antioxidants

- ❖ Ionized alkaline water attracts negatively charged hydroxyl ions, neutralizing free radicals.
- ❖ These ions attach to positively charged toxins in cells, detoxifying the body.

Alkaline water has high pH and –ORP potential, making it an antioxidant.

- ❖ It micro-clusters water for better hydration.

WHY HEALTHY WATER IS A BOOMING MARKET?

- Drinking Hydrogen-rich, Antioxidant, Alkaline, Mineralised Water has multiple health benefits.
- Lack of awareness among people about this beneficial water.
